

# Automotive Service Management, Associate of Applied Science (AAS)

## Description

Working together with Automotive Technology diploma level classes offered residentially at select Lincoln Group of Schools campuses, the Automotive Service Management online degree completion program is designed to prepare students with a strong foundation upon which to build a successful career. **Graduates of this program will earn an Associate of Applied Science (AAS) degree and will possess skills required to enter the automotive industry.**

The overall educational objective of the program is to provide students with the opportunity to gain the knowledge needed for work in the automotive field, emphasizing both theoretical knowledge and hands-on technical skills.\* The Associate degree portion

of the program in particular is designed to develop students' strength in areas pertaining to their personal and professional development, resulting in a well-rounded education. Students are exposed to business management fundamentals to help expand each graduate's opportunities for employment and advancement.

Upon completion of the Associate of Applied Science degree in Automotive Service Management, **graduates will be equipped to confidently pursue employment in such capacities as automotive technician, automotive service assistant, general service technician, shop supervisor or manager and more.**
