

Network Communication and Information Systems (NCIS) with Microsoft Systems, Associate of Science

Description

Working to complement Network Communication and Information Systems diploma level classes offered residentially at select Lincoln Group of Schools campuses, the Network Communication and Information Systems (NCIS) with Microsoft Systems online degree completion program is designed to prepare students with a strong foundation upon which to build a successful career. **Graduates of this program will earn an Associate of Science (AS) degree and will possess the knowledge and skills required to enter the world of Information Technology.**

The overall educational objective of the program is to provide students with a strong foundation in Information Technology including the core principles and procedures of networking concepts, office applications, computer hardware and software, and desktop operating systems.* The Associate degree portion of the

program in particular serves to further expose students to business management fundamentals, the unique challenges of the IT business world and customer service essentials, helping to expand each graduate's opportunities for employment and advancement.

Upon completion of the Associate of Science degree in Network Communication and Information Systems (NCIS) with Microsoft Systems, graduates will be equipped to confidently enter the IT industry where they can secure jobs as computer support specialists, IT technicians, computer and information systems managers, network systems and data communication analysts, and more. **Graduates also have the option of continuing their studies at Lincoln College Online to earn a Bachelor of Science degree in Information Management and Security.**
